

# MEETING REPORT

**Group 10 - ElectroSpaceX**

**Date of Meeting:** 13/04/2022

**Start Time:** 20:00 **End Time:** 23:30

**Meeting Location:** Discord application

**Moderator:** Irklida Voci

**Recorder:** Fatbardha Shahollari

**Other Members Present:** Kevin Mamaj  
Gejsi Dervishi  
Mario Cikalleshi  
Jurgen Cela

**Members Absent:** -

## Topics Discussed:

- Discussion on the technologies we are going to implement.
- Constructing a simple structure of what functionalities the web application will include.
- Sharing various ideas about the continuation of the project, its requirements, user categories and its services provided.
- Communicating with the business representatives, and making a list of requirements on how the web application should look like.
- Reviewing the lecture about Requirement Engineering and trying to comprehend the functional and nonfunctional requirements. Then adapting into real one requirements related to the electronic devices business.
- Discussing about the project overview, its purpose and scope of the requirements.

## Decisions Made:

- We decided to use **PHP** scripting language, due to its efficient performance. As front-end **JavaScript**, **HTML & CSS** and **MySql** database.
- We decided to name our group as ***ElectroSpaceX***.
- After communicating with the business representatives we came into conclusion of creating three users and adding specific functionalities to them. For example the client can buy products, can view its purchases and also give feedback that could be helpful for the business to improve itself.
- We made a brief introduction about the project overview, and also described the purpose of the whole web application which comes quite handy in the trading industry. We also determined the *in scope requirements* and *out of scope requirements* of the project.

## Tasks Assigned:

- Studying the types of requirements, classified as functional and nonfunctional ones.
- Determining some key requirements related to the business we are going to represent.

- Opening a Weekly folder on Github, where each member will upload its own work.

**Time, Place, and Agenda for Next Meeting:**

18:00, Google Meet, Continuation of the requirement document and also designing the diagrams related to the database of the software.
