MEETING REPORT

Group 10 - ElectroSpaceX   **Date of Meeting:**   03/05/2022

Start Time: 16:00   **End Time:** 18:30   **Meeting Location:** Online

Moderator: Irklida Voci   **Recorder:** Jurgen Cela

Other Members Present: Kevin Mamaj
                                  Gejsi Dervishi
                                  Fatbardha Shahollari
                                  Mario Cikalleshi

Members Absent: -

Topics Discussed:
- Discussion on the continuity of the project.
- Sharing different ideas on how to properly design activity diagrams based on use-cases that we had predefined.
- Designing State Diagrams, which will represent the transition of states of the system.
- Discussion on sketching SwimLane diagrams according to activity diagrams.
- Understanding the aim of collaboration diagrams and proceeding with some initial sketches.

Decisions Made:
- Starting to create activity diagrams, which will define the flow of control in our system similar to a flowchart. (Irklida Voci & Fatbardha Shahollari)
- Designing state diagrams for the client interface and the economist interface. Also creating state diagrams about the administrator actions, such as actions on users, products, categories, and orders. (Gejsi Dervishi & Kevin Mamaj)
- Designing swimlane diagrams which are a type of flowchart that delineates who does what in a process. (Jurgen Cela)
- Sketching collaboration diagrams that identify the relationships and interactions among objects of the software. (Mario Cikalleshi)

Tasks Assigned:
- All tasks for this week are related to some of the main diagrams that need to be completed in order to have a functional and effective application.
- Completing activity and state diagrams, is a must.

Time, Place, and Agenda for Next Meeting:
May 9th 18:00, Google Meet, Discussion on diagrams and coding part.
